

وَإِنَّ جُنَدَنَا لَهُمُ الْغَالِبُونَ Qur'an 37:173

Translation attempt: **And Certainly OUR (i.e. ALLAH's) Troops**, surely they will be the **Ghaaliboon (Over-comers, Conquerors)**. (37:173)

... Till ALLAH's Rule is established worldwide & HIS Absolute Greatness accepted worldwide!

(Note: I am just an ordinary Muslim & Islam does not forbid an ordinary Muslim from the above mentioned dream & mission, as long as he abides by the instructions of Islam, & I will only be able to participate as much as ALLAH considers me worth participating.)

آئین جو امر داں، حق گوئی و بے باکی
اللہ کے شیروں کو آتی نہیں روباہی

Translation attempt: *Constitution of the men of courage, declaring the truth & fearlessness*

ALLAH's Lions don't know Rowbaahi (obscuring/hiding the truth by diplomatic, non-straightforward, shrewd use of language/action etc.)

2011 specials extented to 2012, 2013,2014:

1. Idea and work on Pattern Wise Concordance of the Qur'an + Root Wise Concordance of The Qur'an + Letter Wise Concordance of The Qur'an

2. Root List 1 of **more than 300 roots** from the Qur'an released.

Site Last loaded = **7th-April-2014**

Concordance of The Qur'an new version published and many new books added.

Motivation :

1. **100/Infinity=0**. So 100 (life of this world is less than this usually) divided by Infinity (life of hereafter) = 0 (which mathematically & scientifically proves that **this life is nothing compared to the hereafter**).

2. This Finite life of a few dozen years is the most crucial & important portion of our infinite life as it is to be the basis of our infinite life. **Each second here shapes our infinite life ahead!** Intentions x efforts made in this life for the finite age allotted here become the basis of the level of Pleasures or Pains in the infinite life that will be allotted in the hereafter.

3. There are 3 Major categories in the Hereafter. Paradise 1, Paradise 2 and Hell. **Read Surah Waqia (Surah 56)**. And within these 3 major categories there are further divisions depending on the level of intention and striving. e.g. Reward is not the same for all people of one category but differs depending on their intention and striving. **Read Surah An'am (Surah 6) : Ayat 132**

4. Whatever you may like to have in this world, remember that ALLAH is its CREATOR and HE can give you much better version of it or alternate to it in the hereafter, so you should be trying to strive for a higher level of Paradise to get **a better/more beautiful/more pleasing...** etc. version of the thing you want, as once this life is over, you won't be able to increase the level by your own effort. All you have is given to you by ALLAH, and all you can ever want can only be given by ALLAH.

5. Some may say, why mention rewards, why not, only for ALLAH. We do it for ALLAH, but ignoring the rewards created in Paradise specially for its dwellers, is a kind of ungratefulness. It is too easy for ALLAH to create these things. Surah 56 concept of Saabiquun (the ones who take the lead) who are the Muqarrabuun (Those brought near ALLAH). After mentioning this nearness, their rewards are mentioned which are much better than the rewards of Paradise 2. **The higher the level of Paradise, the more the nearness to ALLAH & the better the rewards.** Doing for ALLAH includes not doing something which ALLAH doesn't approve, ALLAH is Ever Merciful, a disobedience once done can be forgiven by ALLAH, but the fact that you have disobeyed ALLAH at that moment in time & space will remain. ALLAH has made this life a test & in this life there are trials & tribulations, do's & don'ts, and struggles etc. Things like struggling for ALLAH, sacrificing our life & wealth for ALLAH can not be done in the Hereafter. if you want to do anything for ALLAH, do it from your remaining allotted worldly life. Now is the time! ... Now!

(**Note:** By Intentions x (i.e. multiplied by) efforts mentioned in point 2, I mean each deed is a combination of intention behind it and effort put into it and

plural of these means all lifelong intention x effort pairs. Some other Forces are also in action like Forgiveness from ALLAH, Forgiveness from the one whose right has been violated, Mercy of ALLAH, correcting the wrong done by the sin, returning to the correct, doing kaffara for the sin (some prescribed act which completely covers up the sin) etc. Paradise 1 & Paradise 2 are not names, but just mentioned to differentiate between the 2 major categories. And ALLAH Knows the Exact Truth!

6. Freely download and watch the following videos as soon as possible:

[Some Names of ALLAH](#) (For authentic description of ALLAH's Attributes read the Qur'an, this video is just a small introduction.)

[Last Breath - Time's Up!](#) , [The Truth of The Life of This World \(Mirror Link \)](#) , [The transitory baubles of this world and our true abode, the hereafter](#)

[The Secret of The Test](#) , [Never Forget \(Mirror Link \)](#) , [Time, One of ALLAH's Great Blessings](#)

[Answers from the Qur'an 1](#) , [Answers from the Qur'an 2](#) , [Answers from the Qur'an 3](#) (Regularly study the Qur'an & try to understand & follow it, these are just introduction)

Note: Most of the above videos are from Harun Yahya & are useful. I only recommend his documentaries I mention on my site, & his material to refute atheism & agnosticism & his material to prove Islam scientifically. Try to avoid his material on internal Islamic issues. He is writing perverted material regarding the Mahdi & some other issues. Still, against Atheism and Agnosticism, his material is necessary.

7. Urdu Lectures:

Urdu: [Realize the importance of time and leave laghw* things](#) (laghw may be explained as anything that neither gives any benefit in the hereafter nor fulfills any legitimate worldly need. Every second is as precious as a big diamond which you either invest for the hereafter or throw away wastefully.)

Concordance of the Qur'an

According to some researchers there may be less than 2000 unique roots used in the Qur'an. Using the Qur'an to explain the Qur'an is the 1st way of Tafsir & for that concordance tools can be useful.

Idea: Studying a root with all its derivatives used in the Qur'an, and patterns of a root with similar patterns used in the Qur'an, e.g. for root ba ray hay, studying all derivatives of it found in the Qur'an and then for its important patterns e.g. Burhaan, studying other similar weights like Furqaan, Subhaan, Sultaan, Ghufraan etc.

Mirror **UPDATED!** for concordance of the Qur'an documents

Note: You must download below PDFs instead of opening in browser so that when you click links, your pdf remains open. If you open pdf online, on clicking any link the pdf will be replaced by webpage of clicked link.

Appendix : Due to 3 books in this section by Qadianis, you must also visit [Detailed refutation of Qadianis](#) , [More books on refutation of Qadianis](#)

Notes: Lane's Lexicon can be used, & is a recognized Arabic Vocabulary tool, but for roots starting with qaaf, kaaf, laam, miim, nuun, hay, waw & ya, explanation & material on roots is usually not complete since Lane died while working on qaaf, & later his nephew completed the work mostly using Lane's notes. LL Mobile can also be used on computers by simply reducing browser width. Lane's Lexicon with English search has some typing errors in Arabic but still can be used "To copy paste the text from the lexicon (after which you will have to verify the Arabic words using any other free scanned Lane's Lexicon relevant material)" and "To search English words". To start navigating it, click the blue arrow on the left of Edward William Lane. Qur'anic Arabic Corpus can be a useful tool but is under construction & Kais is taking his time, so use with additional verification & caution. PRL can be used for quickly studying or downloading Lane's Lexicon relevant pages for roots used in the Qur'an & for checking which derivatives of a root have been used in which Ayaat, but it is stuck near 70% since long time. Avoid the English meanings of PRL completely if you aren't experienced. [www.studyquran.co.uk](#) from which Lane's Lexicon 1st 2 links & PRL are linked is run by a Sunnah rejecter, so try to avoid his remaining material if you don't have sufficient experience. In Dictionary of The Qur'an, negative bias is expected in some meanings like khatama, wafa etc. I mainly recommend using the list of roots used in the Qur'an & derived words for each root used in the Qur'an from this book but study the English material with caution since source referencing style is vague & he is a Qadiani. Dictionary of about 1400+ roots is a vocabulary specific dictionary (focusing on vocabulary & usage, not grammar) that can be used by experienced users with caution since qadiani bias is expected at some places. Concordance of the Qur'an by Hanna uses Arberry's translation & is a limited concordance book that can be checked just to see a preview of concordance uses. Open Burhan is an online concordance tool by a Sunnah rejecter & is not complete yet, so use with caution. Translations comparison tool is only for those who understand sufficient Arabic & just want to check out how others have translated various Ayaat to help them further in their translation attempts, some of the translations given in it are by deviant groups. To use faithfuleye, click A C E at the top for showing/hiding Arabic, Chinese, English. On 2 boxes with go, enter surah # in 1st box and Ayat # in 2nd box & click go, then click Arabic word you want to study in further detail, then check various occurrences & other derivatives of root. For experienced users only as may contain some mistakes, to be used with caution/additional verification. Arabic Urdu Lughat is by Sunnah Rejector who sometimes gives baseless interpretations based on his whims & desires, while sometimes quotes multiple classical lexicons, so only experienced users can use with caution as clear bias is there in some roots. Mazhar A Nurani's site has some grammar notes that experienced users may study. Some views by him are unacceptable e.g. he rejects return of Hazrat 'Eesa (pbuh) despite obvious hints in the Qur'an & his translation attempts contain extra words. Qur'an dev tool appears to be based on corpus site and thus limitations of corpus site, may appear in it also.

(Above 2 books are to be used with caution since author sometimes uses baseless comments e.g. deceptively simple, linguistic problems (i.e. if he can't understand something in Qur'an, it means his skill problem not a problem or complexity in Qur'an) and sometimes criticizes other methods via unjustified sweeping statements e.g. using word atomistic.)

The concept of Sunnah via Amal is not something new, rather older than the use of Ahad Hadith as Sunnah :

Notes: Ahad Hadith OR Isolated Hadith is one which is not a mutawatir hadith & a mutawatir Hadith is Hadith that is narrated by such a large number of people that it is impossible that they have invented a lie, & Hadith that can really be called truly Mutawatir are very few as compared to Ahad Hadith, so most Hadith are actually Ahad Hadith. Of the 4 Sunni fiqh Imams, Imam Abu Hanifa (702-767 CE) & Imam Malik's (717-801 CE) stance towards Ahad/Isolated Hadith was different from Imam Shafi (769-820 CE) & Imam Ahmad Ibn Hanbal (778-855 CE).

Sunnah Sources (Draft 0.5) :

Notes: (Just an attempt, & I accept this must need further improvement & correction, but we should atleast try our best honestly in an unbiased way.)

1. Qur'an Criterion : Sunnah for which foundation, reference, order, hint is found in the Qur'an & which is within the scope of a general order of the Qur'an & is compatible with the Qur'an & has nothing contradictory with the Qur'an. The Qur'an which has been perfectly preserved & protected by ALLAH has the solutions.

2. Amal Standard : Sunnah which is actually practiced, established & is transmitted via practical adherence of a sizeable population of religious Muslims & is found in practice in major Muslim territories & is compatible with the Qur'an & has nothing contradictory with the Qur'an. Amal that is similar to a practical action common with Bible or a way of acting of Jews, Christians, or Arabs of pre-Islamic times, requires strict verification. Similarly, Amal found in a specific region only, or not found in some major Muslim territories & claimed to be Sunnah requires strict verification. Amal common with the amal of other religious communities today must be investigated & rejected if its basis is not found in Islam. Amal that is established & proven to have been followed in early Islamic Caliphate but suspended today just because of corrupt leadership since this kind of Amal can be implemented from a position of authority & cannot be done by individuals or masses without authority, must be studied to get closest to the actual practice & must be implemented again. Amal that is proven not to have been followed during early Islamic Caliphate, whether personal amal or community amal, but having been started somewhere in history at a later period, should be suspended or not presented as an Islamic amal but may be tolerated if it is something not forbidden in Islam.

3. Hadith Standard : All Hadith must be compatible with the Qur'an & must have nothing contradictory with the Qur'an & must meet all Matan Analysis & Isnad Analysis standards. Levels of strength include : Mutawaatir in word, Mutawatir in meaning, Actually practiced by a sizeable population of Muslims, Legal Hadith, practicable Hadith... etc. Hadith that is similar to something mentioned in Bible or some other religious scripture require strict verification. We must focus on legal Hadith 1st. Gathering all related Hadith together, trying to find out the context or situation in which the Hadith is reported to have been said, what is the scope & range of Hadith, was it just for a specific person/persons for a specific time or was it meant to be a regulatory Hadith to be followed in all times to come regardless of circumstances in their time, & what is the actual action of a sizeable population of Muslims regarding the Hadith, how many people actually followed the Hadith through the ages i.e. was the Hadith backed by parallel & continuous amal or not. Hadith on some issues like virtues of personalities, places or against certain personalities should not be enforced on other sects as this is a major area where Hadith fabrication also took place. Then Matan analysis techniques should be applied seriously on all Hadith, because isnad of a Hadith too could have been fabricated or changed.

***Trying** to understand & follow the Sunnah with the acceptance that we may be needing further improvement or correction & that a claimed Sunnah may even be non-regulatory or even unauthentic is what we can & should do, without claiming to be following the exact Sunnah or claiming any sect's stance on Sunnah is perfect, & with further effort & unbiased research, we can get closer & closer to Sunnah. Minor or small differences in performing Sunnah should be tolerated, but if there is a decisive evidence in favor of 1 way or if some group performs a Sunnah or a part of that Sunnah in a way that violates basic principles of the Qur'an, it should be convinced in a friendly manner to the better method. More work must be done on Amal, more work must be done on Hadith. Life is a test for us too, so test is more interesting & challenging, & with more challenges come more opportunities to strive for a higher rank in the hereafter. Will you choose the wrong way to simply join any sect, or will you choose the proper way of not asserting other than the truth & be a truth seeker?

Research for establishment of Islam

Major Research area in the establishment of Islam worldwide is Sunnah. No disagreement on the Qur'an, so next important thing is Sunnah, & uniting Muslims on established Sunnah & solving & explaining solutions to Sunnah related issues that divide, so that strong Muslim unity & Khilafat based on strong foundation is established. This working in an unbiased way is very important so that when the time for establishment of Khilafat comes, it is established

smoothly & the sources i.e. The Qur'an & The Sunnah are well defended & spread intellectually.

Struggle for establishment of Islam

Their opinion regarding how to implement Khilafat needs further improvement in the light of above mentioned more important point

2 major organizations working for establishment of Khilafat , in addition to some personal efforts & other organizations :

www.khilafah.com (Hizb-ut-Tehreer) & www.tanzeem.org (Tanzeem-e-Islami, also gives Dr Israr Ahmed's useful material on the issues along with www.Quranacademy.com). (AI2 comments: I have not joined any but support both, & my major suggestion to both is to run an open public Khilafat campaign without the label of the organizations & work together, since the goal is same i.e. establishment of Khilafat.)

Early History of Khilafat & Malookiat & importance of Khilafat and Muslim Unity

1. Background of replacement of Khilafat by malookiat, and some Muslims' battles and sacrifices to save Khilafat.

Condolence to Muslims in pain worldwide:

No *Khawf* (fear, future related worry), No *Huzn* (sorrow, grief, past related worry), be at peace. Try your best, do all you can & pray to ALLAH and trust ALLAH. Show steadfastness & trust in ALLAH in your trials & sincerely hope for a good reward for this steadfastness. Don't lose hope, the struggle is hard in these tough times & times of confusion, but you can expect a bigger reward struggling in tough times, trying all your best and then showing steadfastness in the face of what ALLAH ordains & allows to happen. Strength & popularity have to be built but those scholars & people who already have popularity must make serious moves to help Muslims & mobilize Muslim masses effectively to solve problems & masses should support the right persons.

Message to Volunteers

5 Lions are still better than 500 Sheep. Independent thinking volunteers brave enough to stick with the truth & declare the truth for ALLAH, even if the whole world criticizes them. I am looking for the fearless lions, who do not hesitate to declare the truth, & face courageously the genuine issues that must be solved to unite Muslims once & for all, and to establish ALLAH's Perfect System of Life, Islam practically...!

Truth has to be declared, assumptions have to be attacked if these are wrong, lies and deliberate cover ups must be exposed to destroy the monopoly of some sectarian scholars who deliberately hide facts from masses to defend & promote their sects. Let the evidences speak for themselves. Truth is good enough, it doesn't have to be covered up or twisted or mixed with falsehood.

باطل دوتی پسند ہے ، حق لا شریک ہے
شرکت میانہ حق و باطل نہ کر قبول!

Feel free to criticize & correct me if I am wrong on some issue as I am just a human being trying to serve ALLAH's System of Life Islam & I may be wrong on some issues, on some issues I may need improvement, on some issues, I may need correction.

Some of my documents are meant to encourage more research, otherwise I won't have published them like this. I am looking for volunteers who are capable of independently doing & spreading the unbiased research without me.

1. Those maintaining backup of all the documents offered here should contact me at asimiqbal2nd@live.com, so that I can discuss how to launch multiple backup versions of this site if for some reason I am unable to continue. The main aim of presenting the documents is to spread them aggressively via upload on multiple sites.
2. Volunteers should keep promoting & spreading this site as much as possible.
3. Volunteers can send me more useful data.

Copyright claims: Copyright claims are valid for original works only, & not on works using other material to produce their works without the permission of the one whose book or work has been used to produce the derived work e.g. Qur'an is meant for all mankind & jinn, but if some one makes use of this Qur'an to produce some book, then he has no legal right to claim copyright on it without the permission of ALLAH to do so. Similarly, Arabic Grammar, Arabic Vocabulary, & Sunnah etc. related works are all using material of people of past times without their permissions to do so. Moral right is there & demands to give reference to the person who compiled the work & publisher, & not to make money from his work etc. Compilers have a right to take cost of printed copies, but have no right to deny free download option despite proper reference or demand any price for download option. In proper Islamic works, nothing is created out of thin air, so nothing being compiled today is original work and so can't be copyrighted but can be moral-righted. See also [copyright issue](#) .
